**Amendments to the Claims:**

This listing of claims will replace all prior versions and listings of claims in the application:

**Listing of Claims:**

- 5 1. (Previously presented) A direct-type backlight unit for flat panel liquid crystal display, comprising:  
a plurality of lamps installed within a housing;  
a reflection plate installed under the plurality of lamps in the housing; and  
a metal diffusion film with a plurality of apertures thereon installed above the plurality of lamps for diffusing light generated by the plurality of lamps.  
10
2. (Original) The direct-type backlight unit of claim 1 wherein the plurality of lamps are a cold cathode fluorescent lamp (CCFL).
3. (Canceled)  
15
4. (Previously presented) The direct-type backlight unit of claim 1 wherein the diffusion film has a thickness of less than 0.5mm.
5. (Previously presented) The direct-type backlight unit of claim 1 further comprises a  
20 diffusion sheet located on the metal diffusion film.
6. (Original) The direct-type backlight unit of claim 1 wherein at least one heat-dissipating piece is disposed at a periphery of the diffusion film.
- 25 7. (Original) The direct-type backlight unit of claim 6 wherein the heat-dissipating piece is made of metal.

8. (Original) The direct-type backlight unit of claim 6 further comprising a heat exchanging means connected with the heat-dissipating piece.
- 5 9. (Original) The direct-type backlight unit of claim 8 wherein the heat exchanging means is a heat pipe.
- 10 10. (Original) The direct-type backlight unit of claim 1 wherein the apertures on the diffusion film have different diameters/dimensions.
11. (Original) The direct-type backlight unit of claim 10 wherein the diameter/dimension of the apertures directly above the lamps is smaller than the diameter/dimension of the apertures not directly above the lamps.
- 15 12. (Original) The direct-type backlight unit of claim 1 wherein the diameters/dimensions of the apertures are the same.
13. (Original) The direct-type backlight unit of claim 12 wherein the diffusion film has a highest aperture packing density at an area directly over the lamps.
- 20 14. (Original) The direct-type backlight unit of claim 1 wherein the apertures are circular, rectangular, or any other shape.
- 25 15. (Previously presented) The direct-type backlight unit of claim 1 wherein the apertures are columns and rows of through slots arranged on the metal film.
